

➤ DBNet coordination group:

- Active group with regular meetings and exchange to maintain and further develop DBNet service
- Publishes quarterly newsletters providing status overview and current topics
 - Suggestion to add possibility for subscription to online version (via Mailchimp)
- Current key priority: transition from GTS based dissemination to WIS2.0
- Input to DBNet group from NWP as a core user
 - We link their questions into the NWP WG via Email list – and collect your feedback
 - More comprehensive feedback on usage and impact studies would be very welcome
 - Open action from ITSC-25: Look into DBNet usage, carry out impact studies and exchange results
 - Suggestion: online meeting dedicated to DBNet usage, e.g. in autumn?

➤ DBNet usage in ITWG community: [ITSC NWP WG survey](#) (overview of sounding data usage)

DBNet – useful material and links

- [WMO guide to DBNet network](#)
- NWP SAF information to support usage: [NWP SAF web page](#) → Monitoring → DBNet
- [List of DBNet data feeds on GTS](#)
including information on GTS bulletin header and filenames for all stations
- [Station status and monitoring of Global <-> Local DBNet data consistency](#)
- Timeliness monitoring:
 - [DBNet station timeliness monitoring](#)
 - Overall data reception monitoring:
 - [Coverage plots for DBNet data](#)
 - [Timeliness of global and overall DBNet data](#)

Suggestion: Add material on DBNet (newsletters and these links) to the NWP WG web page
