

NOAA-TOVS 23 Year Total Column Ozone Product by Neural Network Retrieval System (NNORSY)

Anton K. Kaifel, Martin D. Müller

Center for Solar Energy and Hydrogen Research (ZSW)
Stuttgart, Germany

Outline

- Approach and processing
- Validation
- Comparison
- Trend analyses
- Conclusions
- Movie (09/79-12/01)*

**) mpeg movie of total ozone data (total 1.2GB) available on ftp-site: [ftp.zsw-bw.de/pub/NNORSY/TOVS](ftp://ftp.zsw-bw.de/pub/NNORSY/TOVS)*

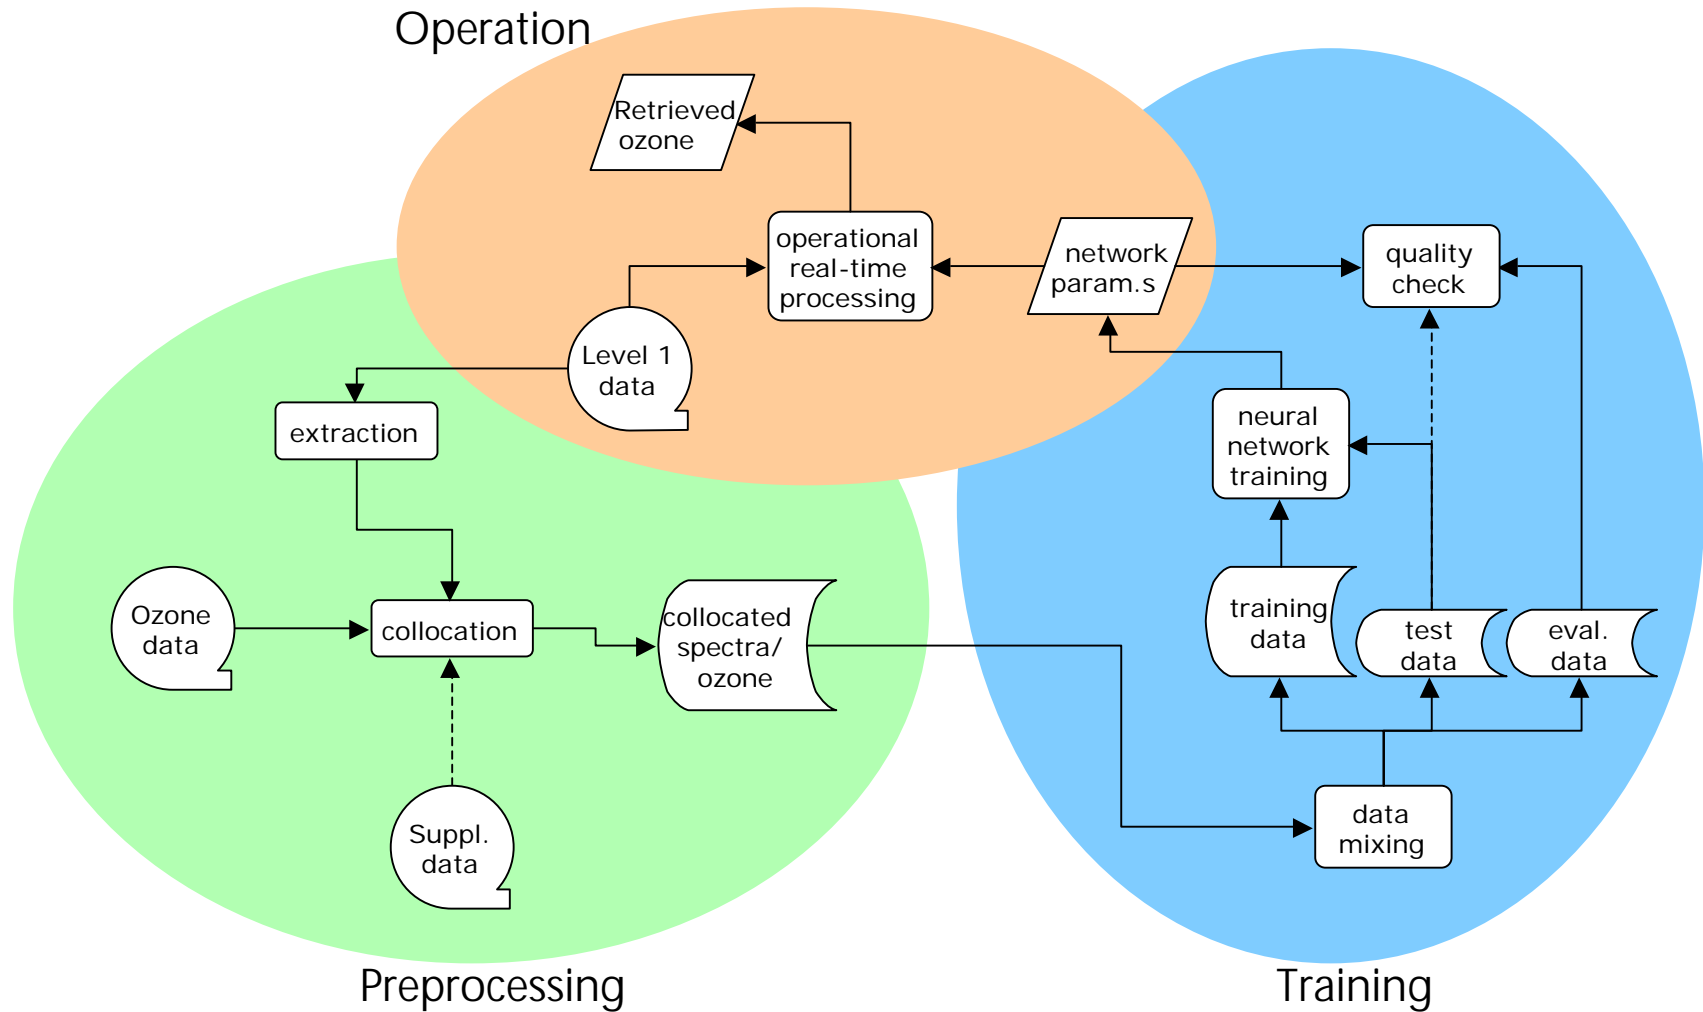

Neural Network Ozone Retrieval System (NNORSY)

Current available:

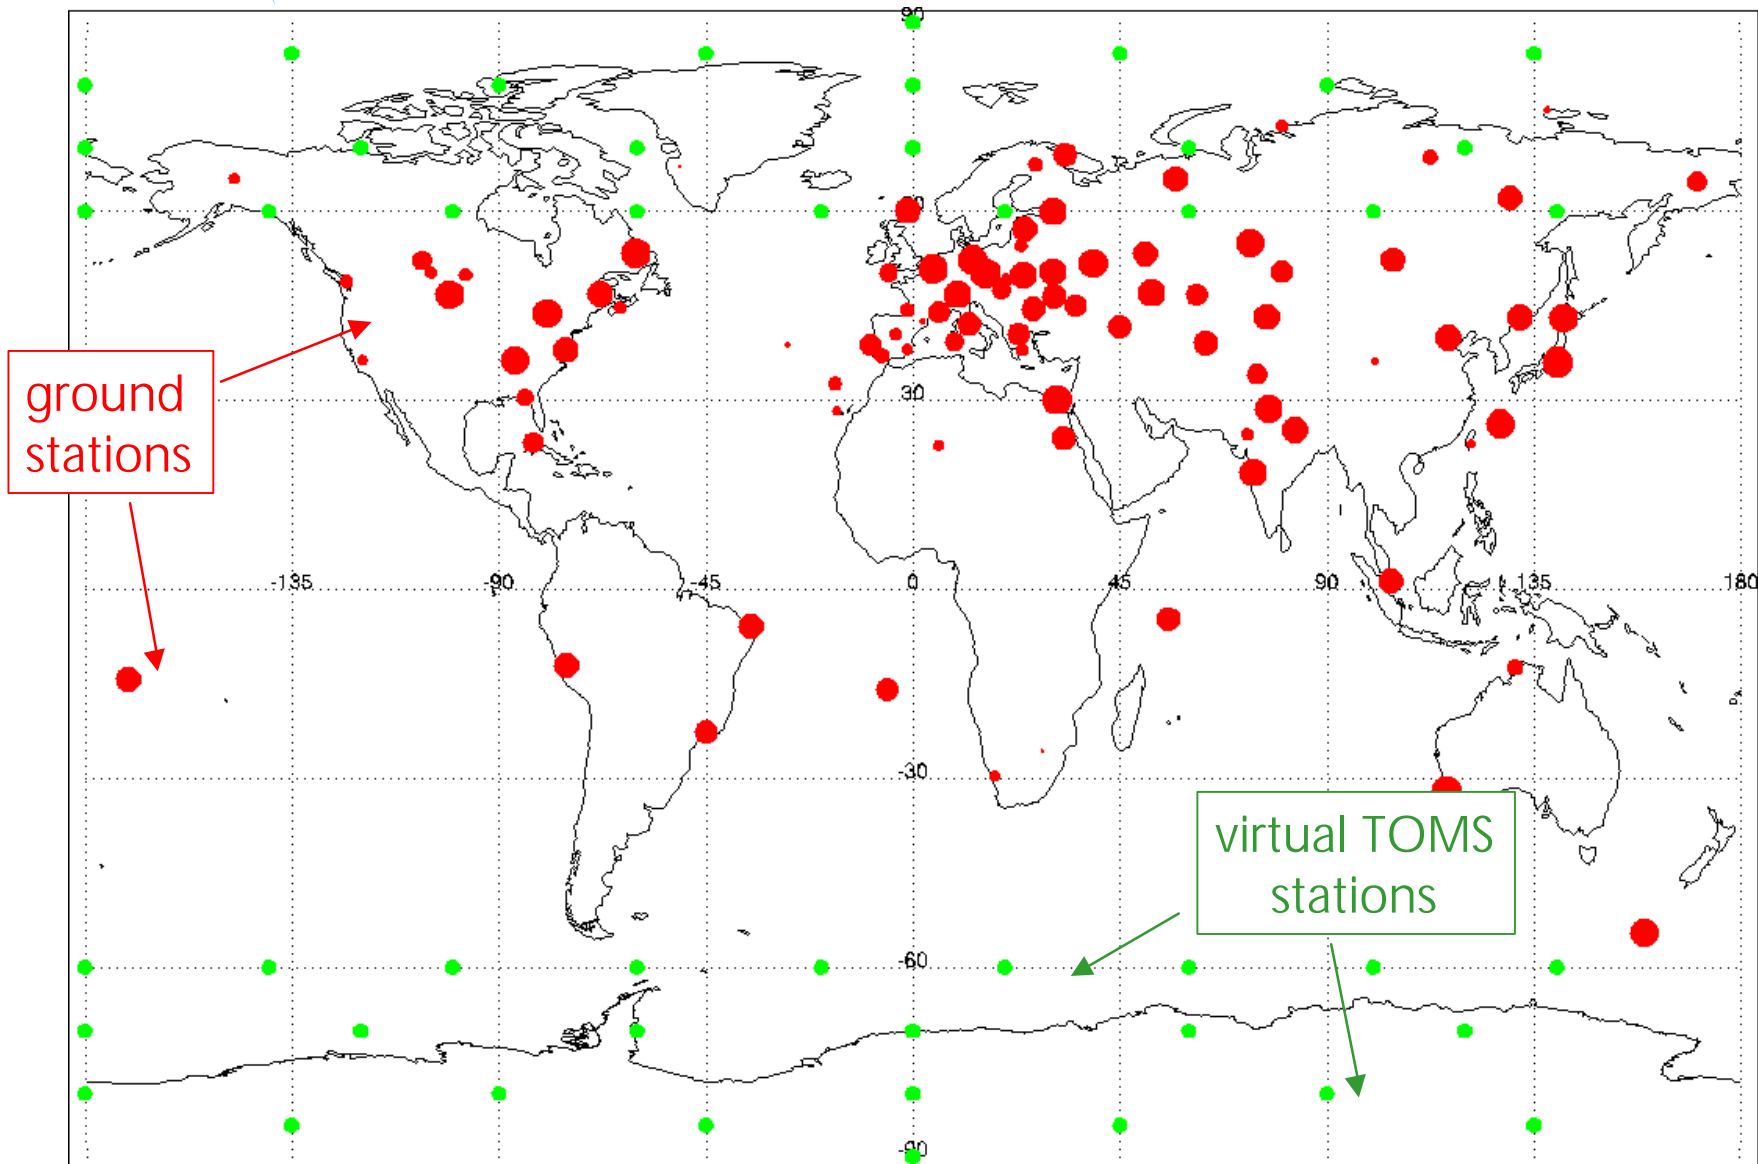

- NNORSY-TOVS (total ozone column)
- NNORSY-GOME (total ozone column)
- NNORSY-GOME (profile)

Planned:

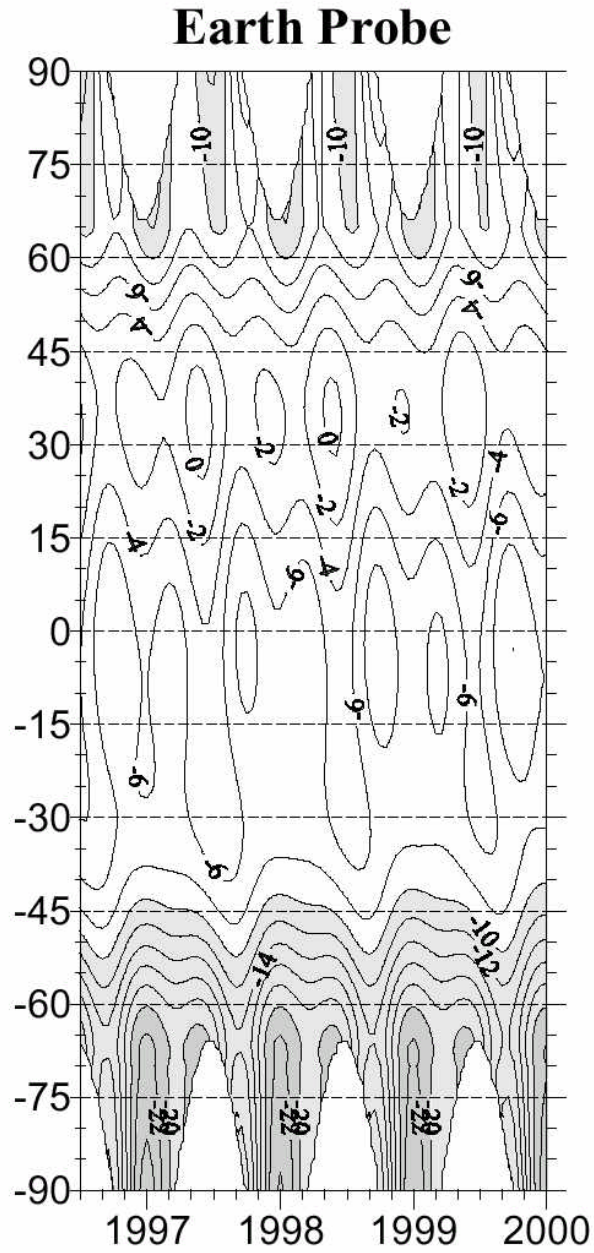

- NNORSY-SEVIRI (total ozone column)
- NNORSY-OMI (profile and total column)

WOUDC/Virtual Station Distribution

EPT-Ground fit over latitude and time (DU)

(Bodeker et al., 2001)

NOAA-TOVS Data at ZSW

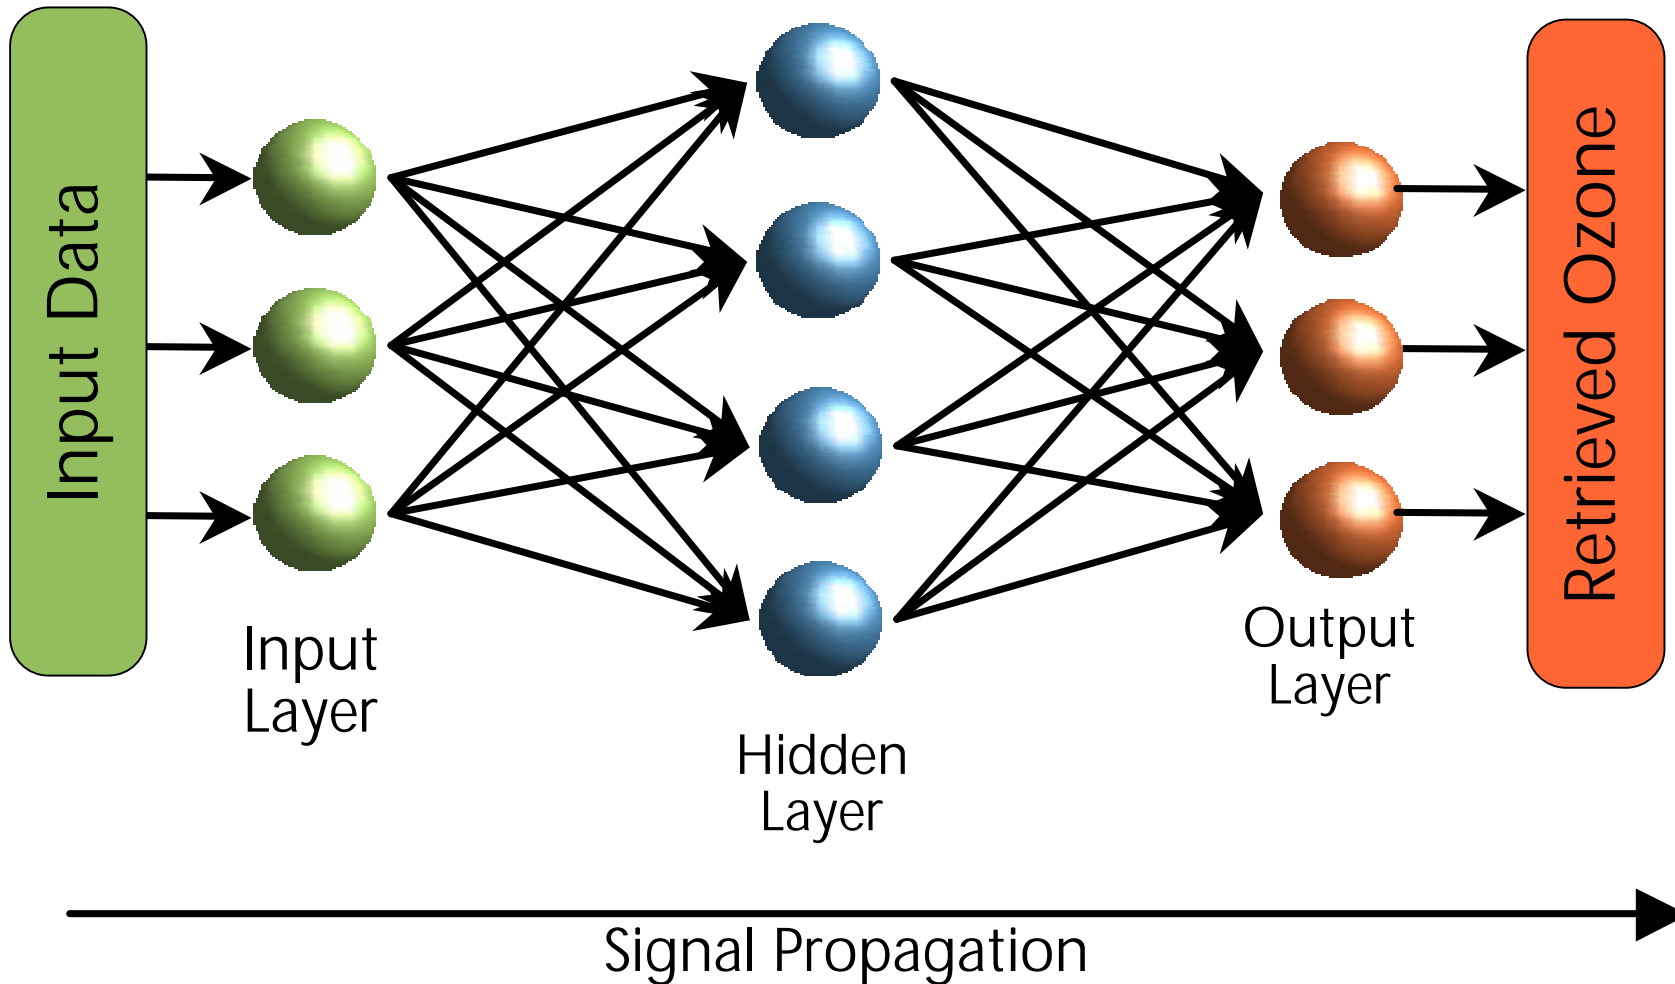

NNORSY-TOVS: Input Data

- Timerange 09/1979 to 01/2002
- Satellites TIROS-N, NOAA-6 to NOAA-14
- Collocation radius 75 km
- yields:
 - ~ 1.5 million training datasets
 - ~ 200000 test datasets

Feed-Forward Neural Network

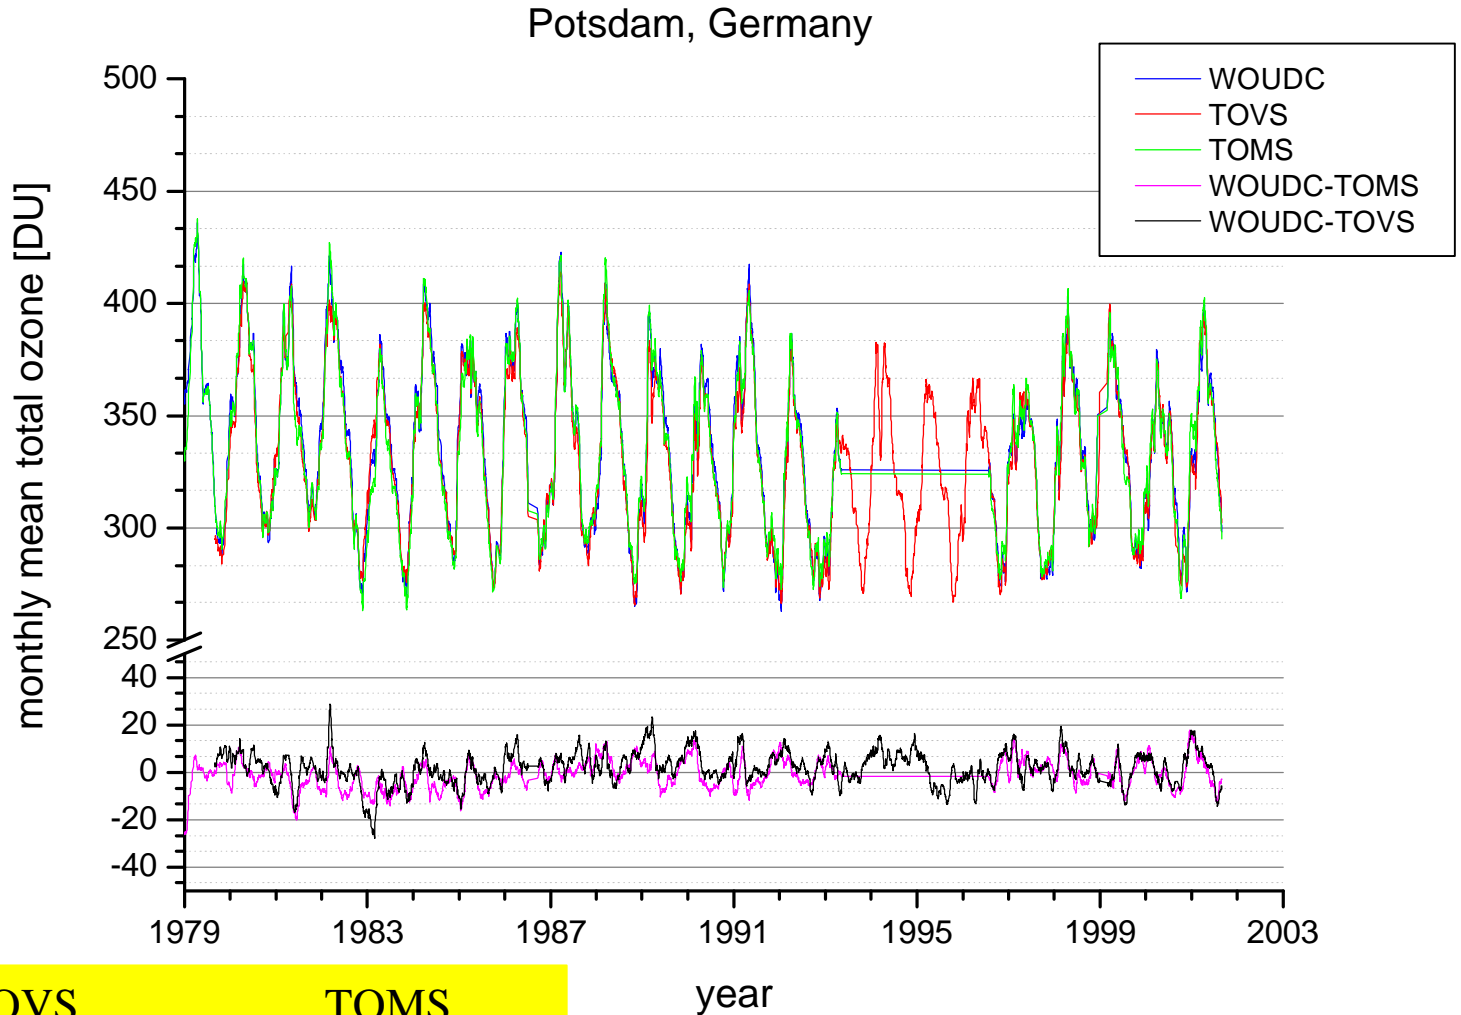

Neural Network Input (28 neurons):

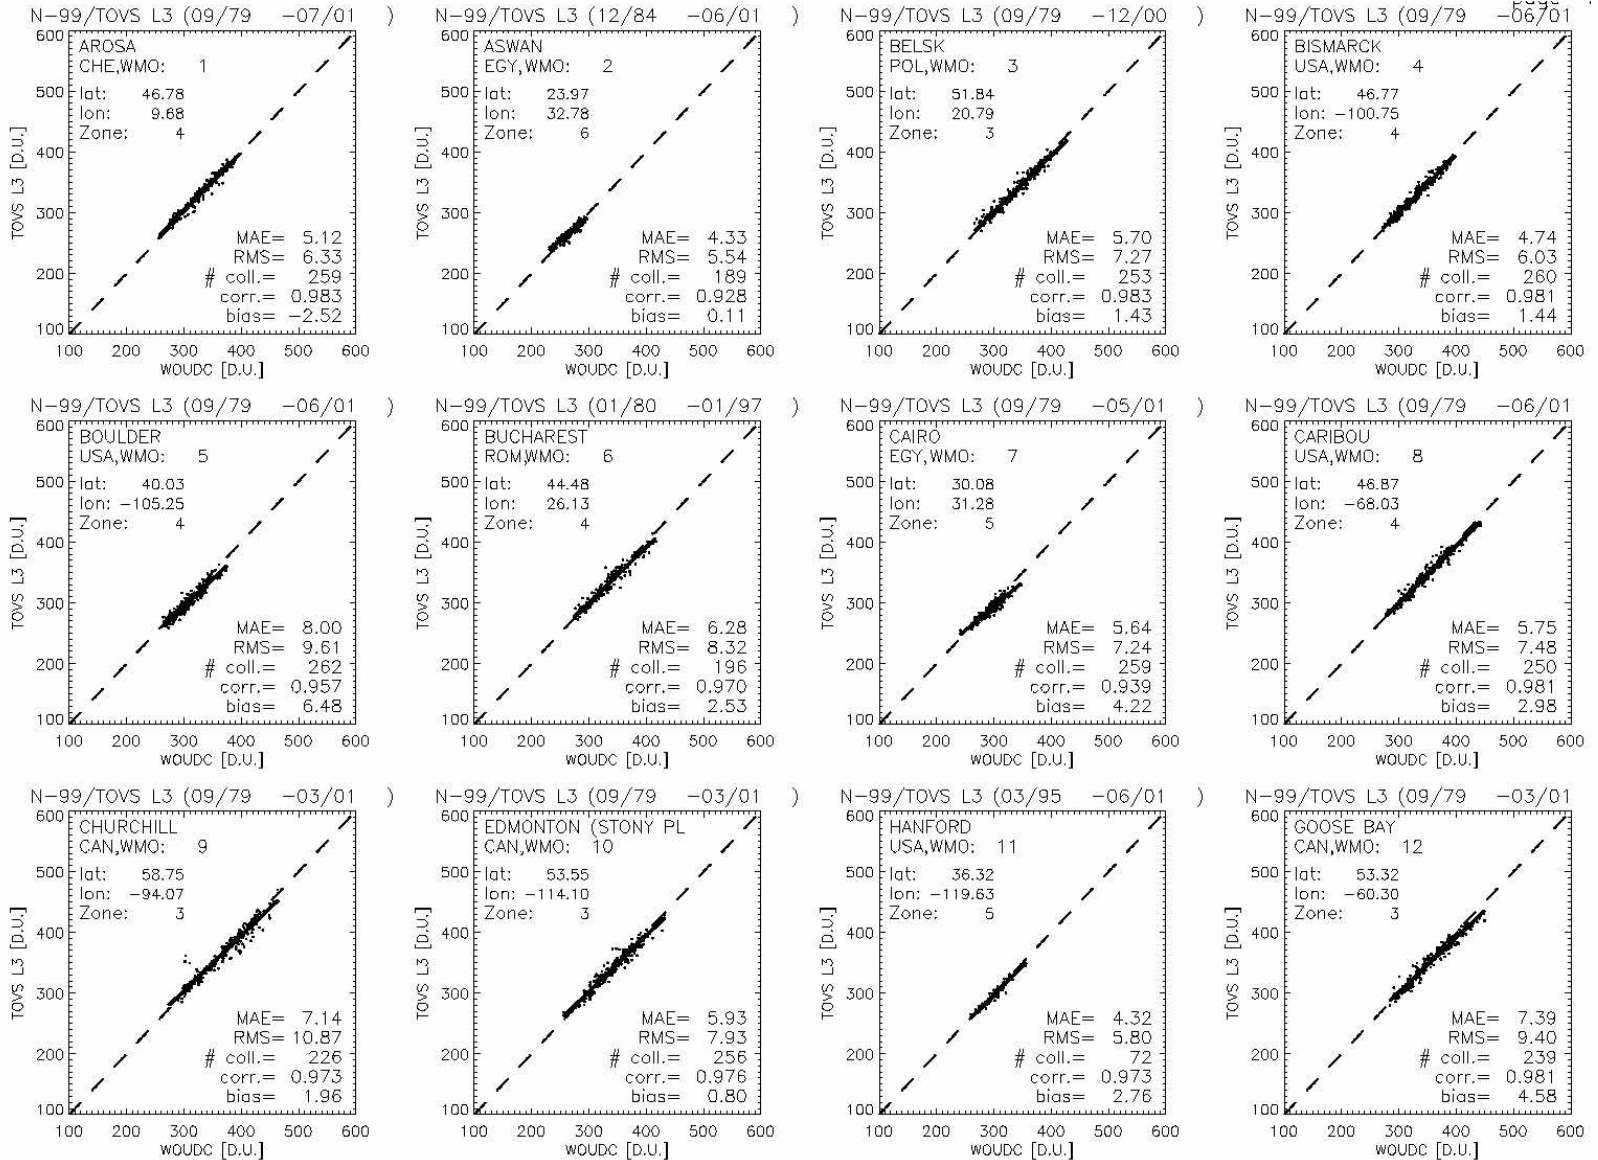

- HIRS channels 1-19
- MSU channels 1-4
- HIRS scan angle
- Solar & satellite zenith angle
- Latitude
- Elevation

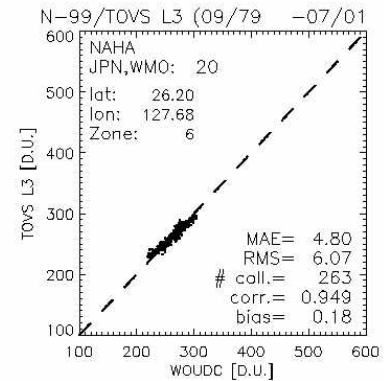

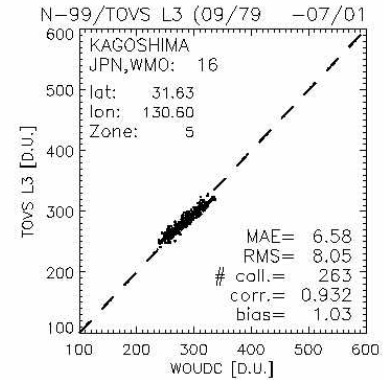

A diagram of a neural network. It consists of two layers of nodes. The top layer is a green rounded rectangle containing the text 'Neural Network Input (28 neurons):' and a bulleted list of input parameters. The bottom layer is an orange rounded rectangle containing the text 'Retrieved Total Ozone'. A dense web of black lines connects every node in the top layer to every node in the bottom layer, representing a fully connected neural network.

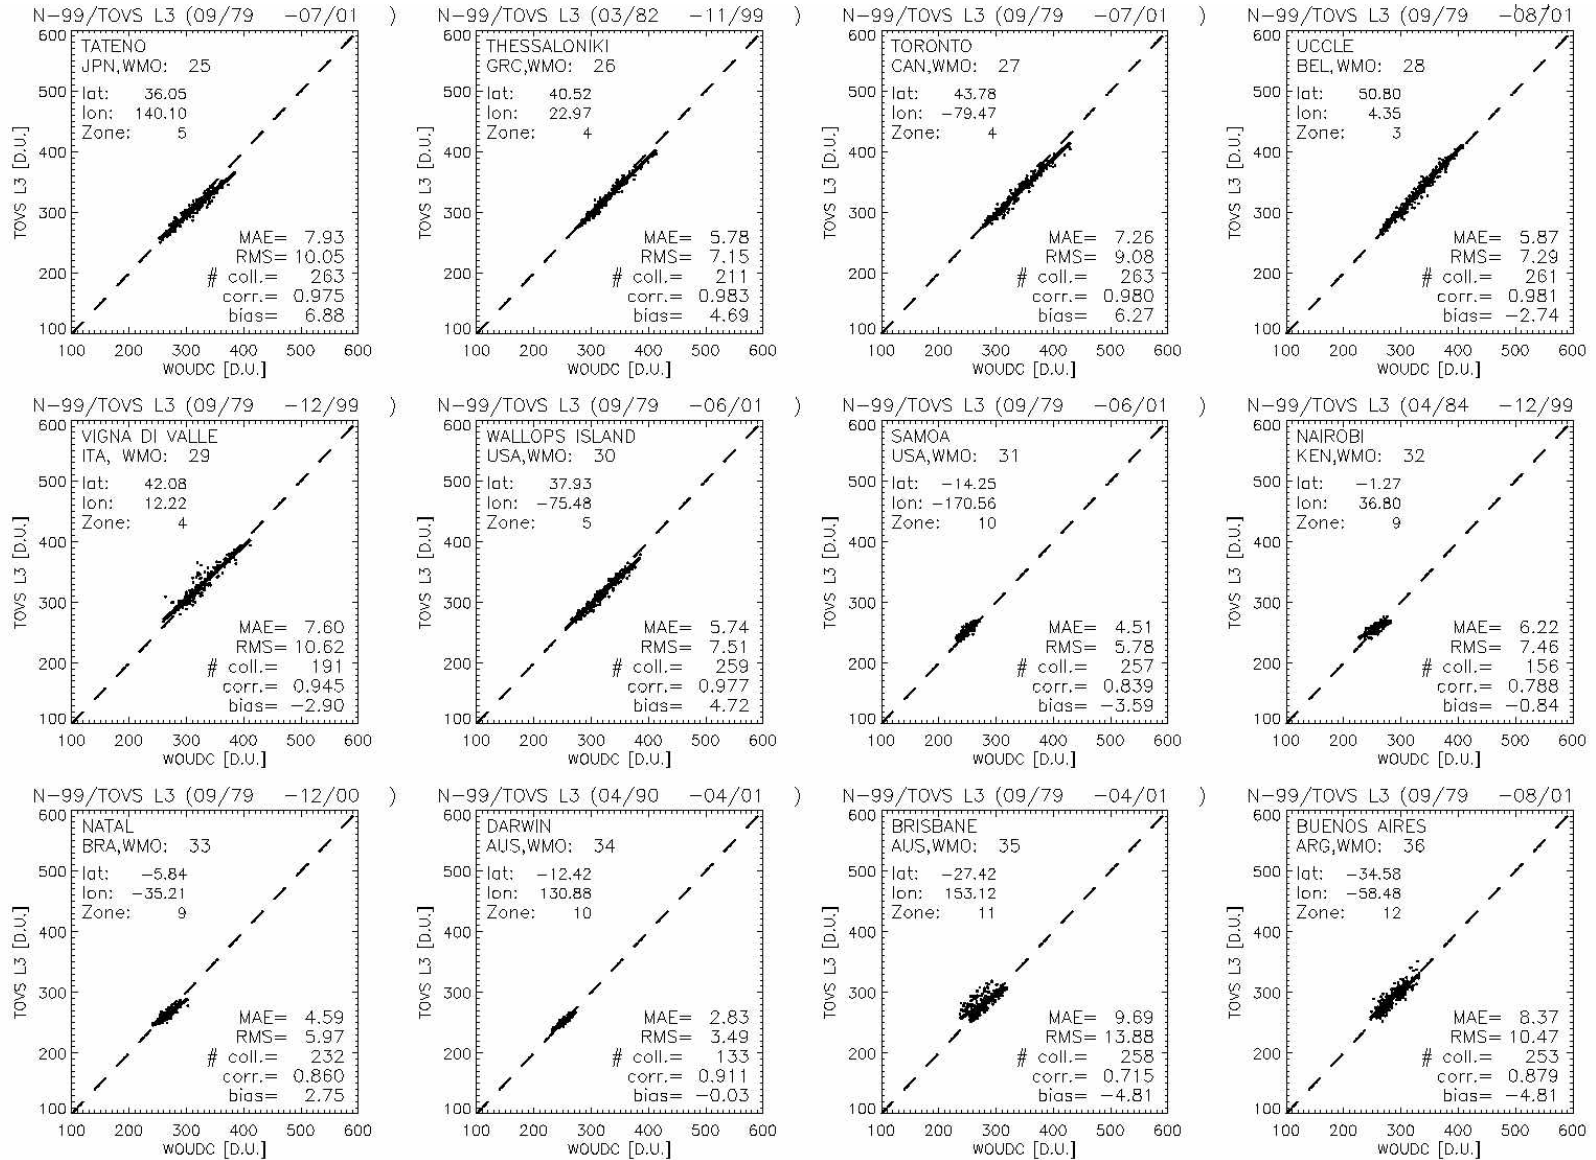

Retrieved Total Ozone

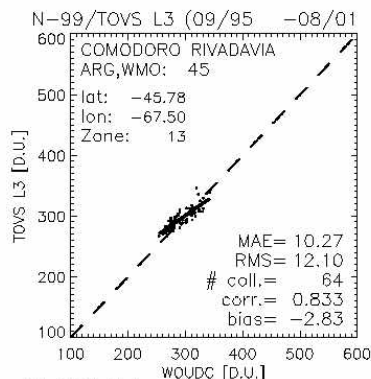

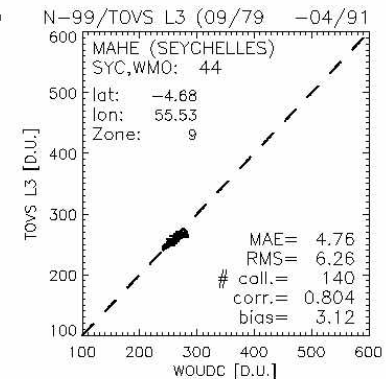

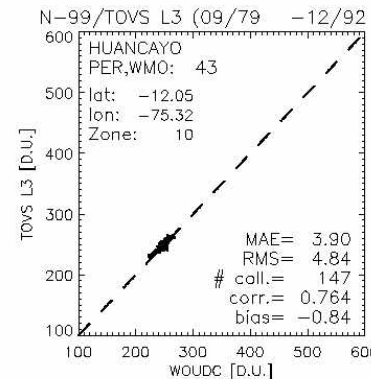

Potsdam	TOVS	TOMS
RMS:	7.2 D.U.	6.5 D.U.
Bias:	1.9 D.U.	-0.9 D.U.

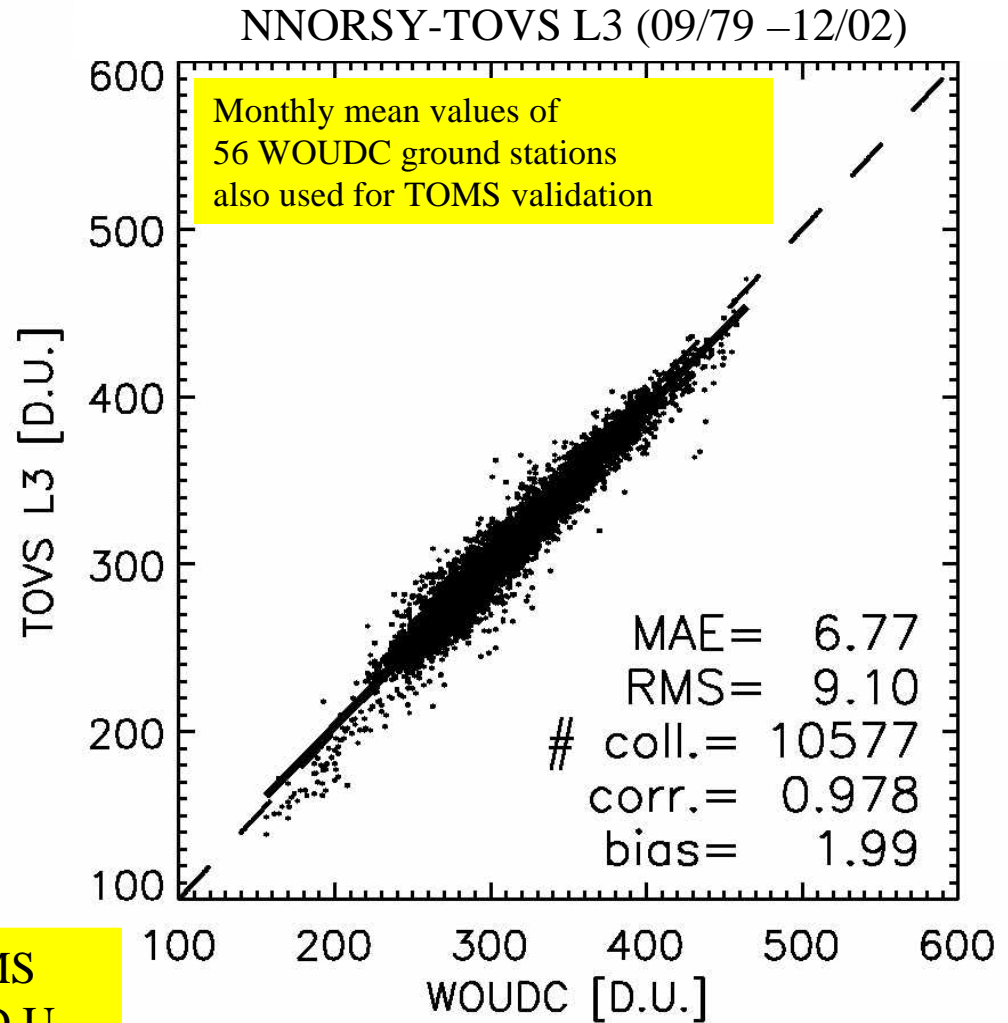

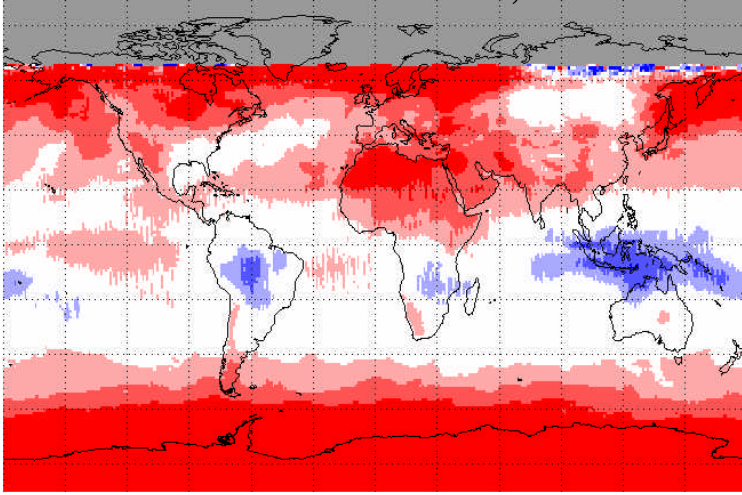

NNORSY-TOVS: Ground validation monthly mean 5/5

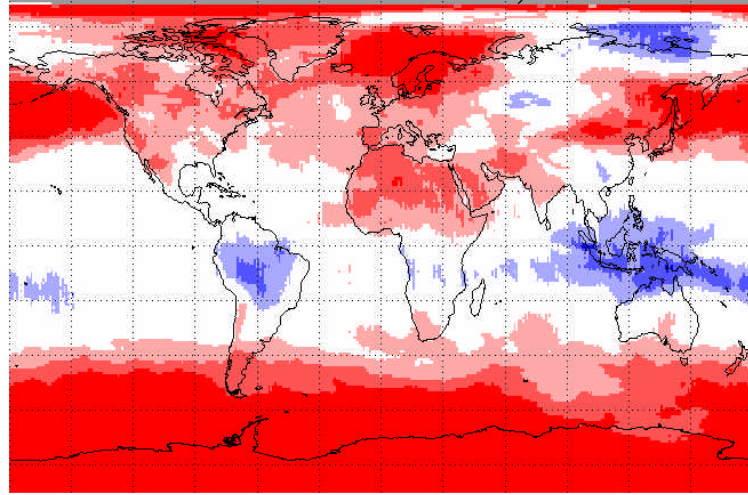

global	TOVS	TOMS
RMS:	9.1 D.U.	8.0 D.U.
Bias:	2.0 D.U.	-2.8 D.U.

Comparison of monthly mean with NOAA operational product 1/2

NNORSY-TOVS: Global trends

Conclusions

NNORSY-TOVS

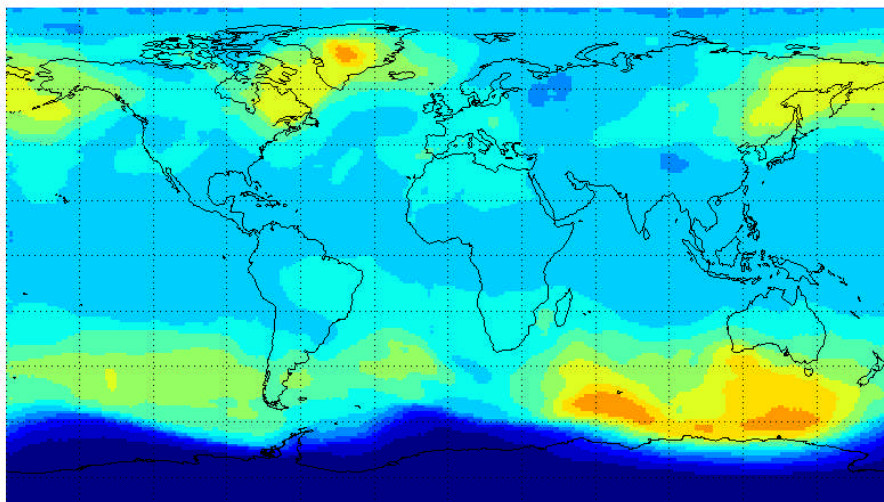

- is very fast
- needs no cloud corrections or a priori information
- needs no limb correction for scan angle
- compares well with other sensors and ground data
- supplement for TOMS data gaps and night time retrieval
- is in real time operation for NOAA 14 at DWD

Future work

- support for NOAA KLM (15,16)
- MSG SEVIRI real time ozone retrieval
- OMI in co-operation with KNMI
- MetOp
