This research is supported by NOAA ABI/HES program

ITSC XIII, Sainte Adele, Canada

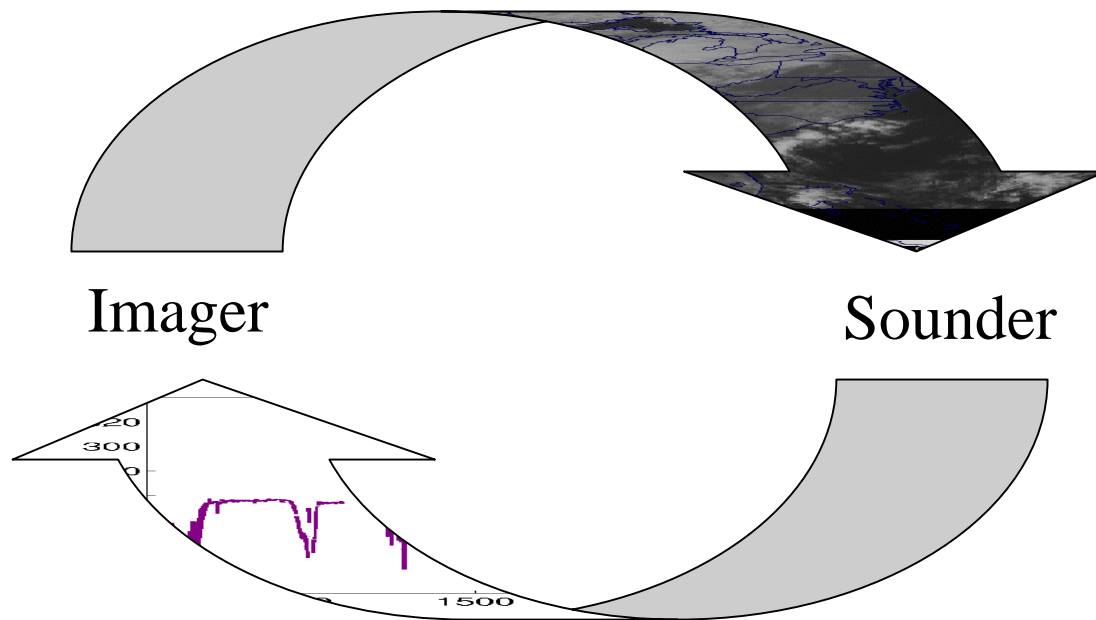

29 October 2003 - 4 November 2003

Best products will be realized from combinations of imager *and* sounder data!

Using MODIS/AIRS data to simulate ABI/HES system !

Better cloud detection and characterization, better spatial, etc

Better surface emissivity, better spectral, better accuracy, etc

What can we do for MODIS/AIRS synergistic retrieval?

- AIRS sub-pixel cloud detection and characterization using MODIS data
- MODIS products serve as the background information for sounder retrieval

AIRS Channel 763 [901.51 cm⁻¹] Brightness Temperature

A1

MODIS classification mask at 1km resolution

Cloudy FOV

What can we do for MODIS/AIRS synergistic retrieval?

- AIRS sub-pixel cloud detection and characterization using MODIS data
- MODIS products serve as the background information for sounder retrieval

1DVAR algorithm for cloud retrieval (Li, Menzel and Schreiner 2001)

Observed AIRS Radiance Measurements

Background Information from MODIS

$$J(X) = [R^m - R(X)]^T E^{-1} [R^m - R(X)] + [X - X_B]^T B^{-1} [X - X_B]$$

Fast Cloudy Radiative Transfer Model: coupled

- (1) Single - Scattering Cloud Model and
- (2) AIRS Clear Sky Radiance Model – SARTA.
- (3) Temperature/moisture profiles are from ECMWF.

$$X = (CTP, ECA_1, ECA_2, ECA_3, \dots, ECA_{10}, CPS, COT)$$

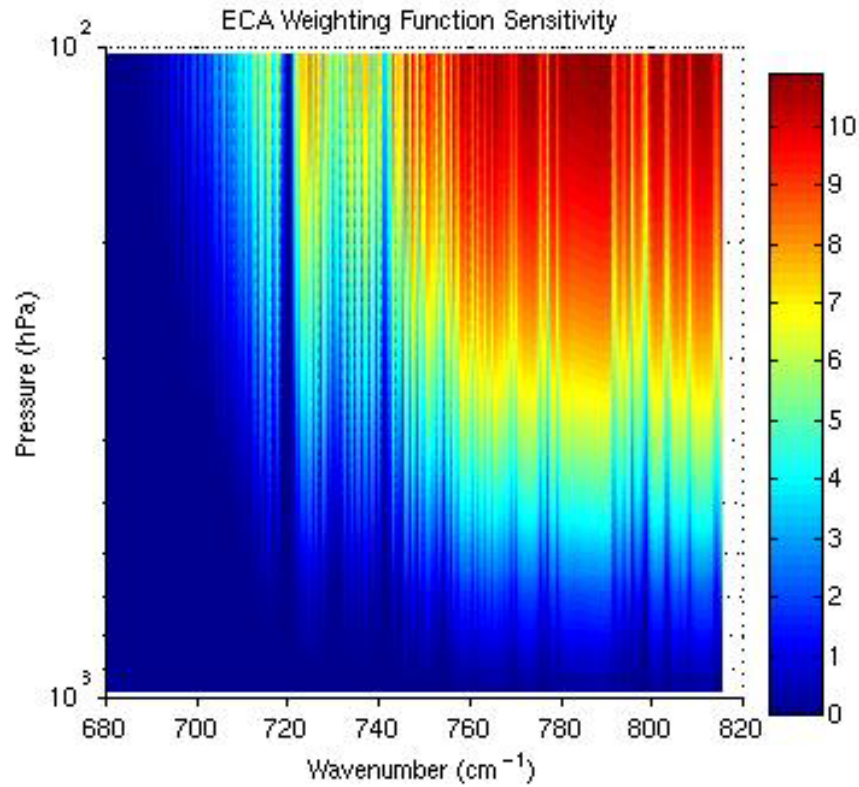

CTP: Cloud-Top Pressure

ECA: Effective Cloud Amount

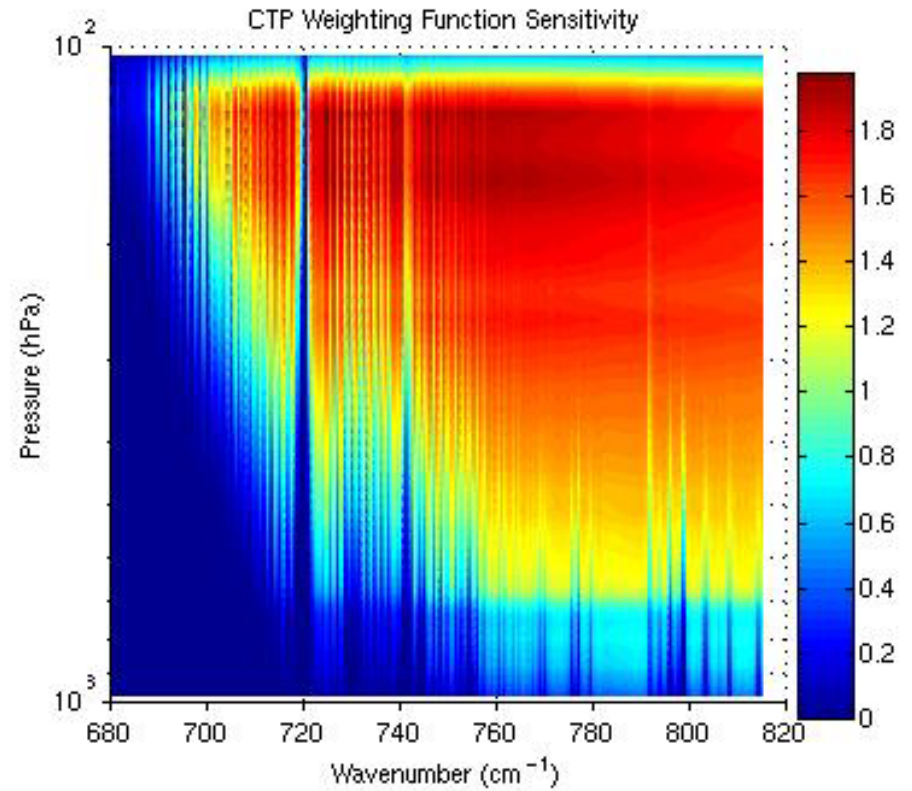

CPS: Cloud Particle Size

COT: Cloud Optical Thickness at $0.55\mu\text{m}$

Summary

- **MODIS data help AIRS sub-pixel cloud detection and characterization**
- **With MODIS products as the background, improved atmospheric and cloud parameters can be obtained from sounder radiance measurements**
- **Other**
 - **Improved imager SST products with sounder emissivity retrieval**
 - **Image product + sounder product => better imager product**

Future work

- Synergistic use of MODIS/AIRS for retrieving the atmospheric profiles and cloud properties simultaneously
- Prepare ABI/HES retrieval system, MODIS/AIRS data will be used
