The ITWG Web Site:
Creating a Useful Forum for the Community
Leanne Avila, Tom Achtor, Roger Saunders
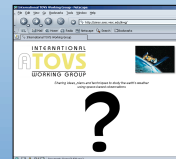

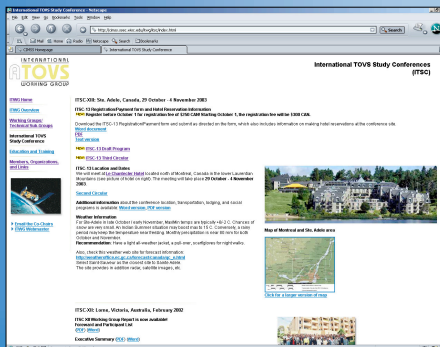

Have you seen the new ITWG web site?

http://cimss.ssec.wisc.edu/itwg/

Following the election of the new co-chairs, Roger Saunders and Tom Achtor, maintenance of the ITWG web site was transferred (new web address: http://cimss.ssec.wisc.edu/itwg/). Working closely with the ITWG co-chairs and with several of the working group co-chairs, we have been redesigning the site to create not only a more aesthetically pleasing page, but also to create a more useful forum for the ITWG community. News and Highlights have been added to provide a more dynamic element to the site. Numerous updates, including practical information, regarding this ITSC conference have been posted to the ITWG web site to encourage users to continue to visit. We will continue to find ways to enhance the usefulness of the site with input from the community.

ITSC-13 Information

At Your Fingertips

We kept you up-to-date on all the latest information regarding ITSC-13… circulars, registration, details about your presentations and papers, hotel information, draft agendas, information about the area… anything you might need to plan your stay during the conference.

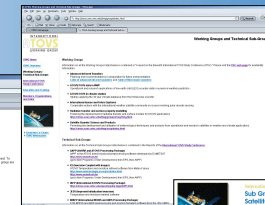

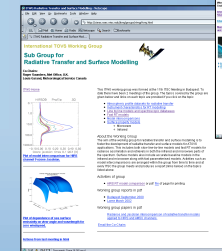

The ITWG Web Site…

More Than ITSC-13 Information

Perhaps you came to the ITWG web looking for ITSC-13 information, maybe you stayed to learn more about ITWG and what the web site has to offer.

Did you know…

❖ We have several very active working groups with their own web pages. Take a look! We would like to see all working groups have a web site.

❖ We have many links to related web sites… from agencies to projects. What links can we add?

Radiative Transfer Surface Modeling

SSSP

Let us know how we can improve the site…

❖ What other content can we add to the site to make it more useful?

❖ Help us make the ITWG web site a useful forum for the community.

Coming Up Next!

Stop by the web site following the conference for:

❖ Links to oral presentations and posters (PDF format)

❖ Conference Proceedings

❖ Working Group reports

❖ More content from the various working groups
